

**TROCAL<sup>®</sup>**  
Always good for new ideas.

TROCAL InnoNova\_70. M5 *elegance*:  
The slim centre seal profile  
with the elegant line.

# TROCAL InnoNova\_70.M5 *elegance*: setting new standards.

»» The offset arrangement of frame and sash makes TROCAL InnoNova\_70.M5 *elegance* a window with style. Not only is its lean visible sight line particularly attractive, its pronounced round contours also facilitate a visually appealing facade design.

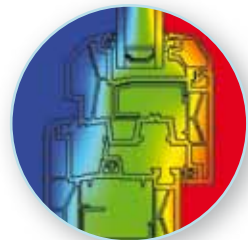

#### »» Centre seal.

The seal at the centre of the frame section is designed to create a pressure equalized rain screen design to give you the highest performance when it comes to resisting wind, water, cold and noise intrusions. The invisible seal is designed to increase the window's sealing properties with greater wind pressure. It supports the gentle contours of the window, is welded at all four corners and is located in front of all hardware for ideal protection against corrosion.

#### »» Colour and design.

Colour gives windows and façades a new face. Utilize the many possibilities that the TROCAL colour range can give you.

#### »» Thermal insulation.

The 70mm deep profiles with Uf-factor for the frame of 1,2 W/m<sup>2</sup> K a will meet the requirements of even the most stringent Energy codes world wide. Combine Economy and Ecology, it pays off short and longterm.

#### »» Five chambers.

The unique, honeycombed profile chambers enhance the window's inherent structural stability, while counter-acting torsion.
